

HAZMAT Emergency Response Operations

This training is for individuals who initially respond in a defensive fashion to releases of hazardous substances for the purpose of protecting life, property, or the environment.

Learning Objectives:

- Implement hazard and risk assessment techniques
- Understand various hazardous materials terms
- Determine appropriate levels of personal protective equipment for HAZMAT events
- Perform control, containment, and confinement operations
- Implement basic decontamination and termination procedures
- Differentiate between an emergency and non-emergency spill
- Identify potential equipment, manpower, and other resources necessary to implement a spill response
- Conduct proper response in the case of a spill, leak, or other type of pollutant discharge as well as reporting requirements to the various governmental entities

Duration: 8 hours

Exam: Must score 80% to pass the exam
